

# **ANNAMALAI UNIVERSITY**

## **DIPLOMA IN PHARMACY**

### **PART – I PART – II AND PART – III**

### **RULES AND REGULATIONS 2019**

**This document shall be called as D.Pharm. Academic Regulations - 2019 of Annamalai University. These academic regulations shall come in to force from the academic year 2019 - 2020.**

Rules and Regulations for conducting Diploma in Pharmacy Part – I and Part – II Courses and examination and Part – III Practical training by Annamalai University and will be called as “D.Pharm. Academic Regulations 2019 of Annamalai University” They shall come into effect from the Academic Year 2019-20. The regulations framed are subject to modifications from time to time by the authorities of the Annamalai University.

### **DIPLOMA IN PHARMACY (PART – I AND PART – II)**

1. Minimum qualification for admission to Diploma in Pharmacy Part – I course.

A pass in any of the following examinations with Physics, Chemistry, Biology and Mathematics.

- a. Intermediate examination in Science.
- b. The first year of the three year degree course, in Science.
- c. 10 + 2 examination (academic stream) in Science.
- d. Pre-degree examination; or
- e. Any other qualification approved by Annamalai University and the Pharmacy Council of India as equivalent to any of the above examinations.

2. Duration course:

The duration of the courses shall be for two academic years, with each academic year spread over a period of not less than one hundred and eighty working days in addition to 500 hours practical training spread over a period of not less than 3 months.

3. Course of Study:

The course of study for Diploma in Pharmacy Part – I and Diploma in Pharmacy Part – II shall include the subjects as given in the Tables I & II below. The number of hours devoted to each subject for its teaching in, Theory and Practical shall not be less than that noted against it in columns 1 and 2 of the Tables below.

**TABLE – I**  
**DIPLOMA IN PHARMACY (PART – I)**

	<b>(A)</b>	<b>(B)</b>
<b>Subject</b>	<b>No. of hours of theory</b>	<b>No. of hours of practical</b>
Pharmaceutics – I	75	100
Pharmaceutical Chemistry – I	75	75
Pharmacognosy	75	75
Biochemistry & clinical Pathology	50	75
Human anatomy & Physiology	75	50
Health Education & community Pharmacy	50	
total	400	375 = 775

**TABLE – II**  
**DIPLOMA IN PHARMACY (PART – II)**

	<b>(A)</b>	<b>(B)</b>
<b>Subject</b>	<b>No. of hours of theory</b>	<b>No. of hours of practical</b>
Pharmaceutics – II	75	100
Pharmaceutical Chemistry – II	100	75
Pharmacognosy & Toxicology	75	50
Pharmaceutical Jurisprudence	50	...
Drug Store and Business Management	75	...
Hospital and Clinical Pharmacy	75	50
total	450	275 = 725

4. The syllabus for each subject of study in the said tables shall be as specified in Appendix A to these regulations.

5. Examinations:

There shall be an examination for Diploma in Pharmacy (Part – I) to examine the students of the first year course and an examination for Diploma in Pharmacy (Part – II) to examine students for the second year course. Each examination may be held twice in a year. The first examination in a year shall be supplementary examination of the Diploma in Pharmacy (Part –I) or Diploma in Pharmacy (Part – II), as the case may be. The examinations shall be of written and practical (including oral) nature, carrying maximum marks for each part of a subject as indicated in table III and IV below:

**TABLE – III**  
**DIPLOMA IN PHARMACY (PART – I) EXAMINATION**

Subject	Maximum Marks for Theory			Maximum Marks for Practical		
	Examination	Sessional	Total	Examination	Sessional	Total
Pharmaceutics – I	80	20	100	80	20	100
Pharmaceutical Chem – I	80	20	100	80	20	100
Pharmacognosy	80	20	100	80	20	100
Biochemistry & Clinical Pathology	80	20	100	80	20	100
Human Anatomy & Physiology	80	20	100	80	20	100
Health Education & Community Pharmacy	80	20	100	...	...	...
			600			500
Total					=	1,100

\* Internal assessment

**TABLE – IV**  
**DIPLOMA IN PHARMACY (PART – II) EXAMINATION**

Subject	Maximum Marks for Theory			Maximum Marks for Practical		
	Examination	Sessional	Total	Examination	Sessional	Total
Pharmaceutics – I	80	20	100	80	20	100
Pharma Chem – II	80	20	100	80	20	100
Pharmacology & Toxicology	80	20	100	80	20	100
Pharmaceutical Jurisprudence	80	20	100			
Drugs Store & Business Management	80	20	100			
Hospital & Clinical Pharmacy	80	20	100	80	20	100
			600			400
Total					=	1,000

\* Internal assessment

#### 6. Eligibility for appearing at the Diploma in Pharmacy Part – I Examination:

Only such candidates who produce certificate from the Head of the Inst. of Pharm. Technology, Annamalai University in proof of his/her having regularly and satisfactorily undergone the course of study by attending not less than 75% of the class held both in theory and in practical separately in each subject shall be eligible for appearing at the Diploma in Pharmacy (Part – I) examination.

7. Eligibility for appearing at the Diploma Pharmacy Part – II Examination:

Only such candidates who produce certificate from the head of the Inst. of Pharm. Technology, Annamalai University in proof of his/her having regularly and satisfactorily undergone the Diploma in Pharmacy Part – II course by attending not less than 75% of the classes held both theory and practicals separately in each subject, shall be eligible for appearing at the Diploma in Pharmacy (Part – II) examination.

8. a. Teachers are required to maintain attendance of students in Attendance Register.

8. b. Student Counsellors (Mentors)

To help the students in planning their course of study and for general advice on the academic programme, the Dean / Head of the Department will attach a certain number of students to a member of the faculty who shall function as student counsellor for those students throughout their period of study. Such student counsellors shall advise the students, give preliminary approval for the courses to be taken by the students during each semester and obtain the final approval of the Dean/ Head of the Department.

9. Mode of Examinations:

- a. Each theory and practical examination in the subject-mentioned in table – III & IV shall be of three hours duration.
- b. A candidate who fails in theory or practical examination of a subject shall re-appear only in theory or practical, of the same subject.
- c. Practical examination shall also consist of a viva-voce (oral) examination.

10. Award of Sessional Marks and maintenance of Records.

- a. A regular record of both theory and practical class work and examinations conducted in by Annamalai University for Diploma in Pharmacy Part – I and Diploma in Pharmacy Part – II courses, shall be maintained for each student and 20 marks for each theory and 20 marks for each practical subject shall be allotted as sessionals.
- b. There shall be at least three periodic sessional examinations during each academic year. The highest aggregate of any two performances shall form the basis of calculating sessional marks.
- c. The sessional marks in practicals shall be allotted on the following basis.

Actual performance in the practical sessional examination – 10.

Day to Day assessment in the practical class works – 10.

11. Minimum Marks for passing to examination:

A statement shall not be declared to have passed D.Pharm exam unless he/she secures at least 40% in each subject separately in theory and practical

exam. However they have declared to have passed the subject (&) in which they secure more than 40 marks.

The Candidate securing 60% marks or above in aggregate in all subjects in a single attempt at the Diploma in Pharmacy (Part – I) or Diploma in Pharmacy (Part – II) examinations shall be declared to have passed in first class the Diploma in Pharmacy (Part – I) or Diploma in Pharmacy (Part – II) examinations, as the case may be candidates securing 75% marks or above in any subject or subjects shall be declared to have passed with distinction in that subject or these provided he/she passes in all the subjects in a single attempt.

12. Eligibility for promotion to Diploma in Pharmacy (Part – II)

All candidates who have appeared for all the subjects and passed the Diploma in Pharmacy Part – I Examination are eligible for promotion to the Diploma in Pharmacy Part – II class. However, failure in more than any two theory and any two practical papers of D.Pharm first year subjects shall debar him/her from promotion to the Diploma in Pharmacy Part – II class.

13. Improvement of sessional Marks:

Candidates who wish to improve sessional marks can do so, by appearing in two additional sessional examinations during the next academic year. The average score of the two examinations shall be on the basis for improved sessional marks in theory. The sessional of practicals shall be improved by appearing in additional practical examinations. Marks awarded to a candidate for day to day assessment in the practical class, can not be improved unless he/she attends a regular course of study again.

14. Certificate of passing examination for Diploma in Pharmacy (Part – II)

Certificate for having passed the examination for the Diploma in Pharmacy, Part – II shall be granted by the Annamalai University to a student after the successful completion of Part – I and Part – II, respectively.

15. Rule pertaining to the conductance of University theory and practical examinations for D.Pharmacy Part – I and Part – II of Annamalai University.

As per the existing rules and regulations.

**DIPLOMA IN PHARMACY (PART – III)**  
**(PRACTICAL TRAINING)**

16. Period and other conditions of Practical training:

- a. After having appeared in Part – II examination of Diploma in Pharmacy conducted by the Annamalai University a candidate shall be eligible to undergo practical training into one or more of the following Institutions namely:
  - i. Hospitals / Dispensaries run by Central / State Government / Municipal Corporations / Central Government Health Scheme and Employees State Insurance Scheme.

- ii. A pharmacy, Chemist and Druggist licensed under the Drugs and Cosmetic Rules, 1945 made under the Drugs and Cosmetic Act, 1940 – 923 of 1940).
  - iii. Drugs manufacturing Unit licensed under the Drugs and Cosmetics Act, 1940 and rules made there under.
- b. The Institutions referred in sub-regulation (1) shall be eligible to impart training subject to the condition that the member of student pharmacists that may be taken in any hospital Pharmacy, chemist and druggist and Drugs manufacturing unit licensed under the Drugs manufacturing unit licensed the Drugs and Cosmetics Rules 1945 made under the Drugs and Cosmetics Act, 1940 shall not exceed two where there is one registered pharmacist engaged in the work in which student pharmacist in which student is under going practical training, where there is more than one registered pharmacist similarly engaged, the number shall no, exceed one for each additional such registered pharmacist.
- c. Hospital and Dispensary other than those specified in sub religion (1) for the purpose of giving practical training shall have to be recognised by Pharmacy Council of India on fulfilling Conditions specified in Appendix D to these regulations.
- d. In the course of practical training, the trainee shall have exposure to.
- i. Working knowledge of keeping of records required by various act as concerning the profession of Pharmacy and
  - ii. Practical experience in
    - a. The manipulation of Pharmaceutical apparatus in common use.
    - b. The reading, translation and copying of prescription including checking of doses;
    - c. The dispensing of prescriptions illustrating the commoner methods of administering medicaments and
    - d. The storage of drugs and medicinal preparations.
    - e. The practical training shall be not less than five hundred hours spread over a period of not less than three months, provided that not less than two hundred and fifty hours are devoted to actual dispensing of prescriptions.
17. Procedure to be followed prior to commencing of the training;
1. The Head of the academic training institution, on application shall in triplicate issue the 'Practical Training Contract Form for qualification as Pharmacist' (herein after referred to as the Contract Form) to candidate eligible to under-take the said practical training. The Contract Form shall be as specified in Appendix – E to these regulations.
  2. The Head of the academic training institution shall fill section I of the Contract Form The trainee shall fill section II of the said Contract Form and the Head of the institution agreeing to impart the training (herein after

referred as the Appendix – C Register) shall fill section III of the said Contract Form.

3. It shall be the responsibility of the trainee to ensure that one copy (herein after referred to as the first copy of the contract form) so filled is submitted to the Head of the academic training institution and the other two copies (hereinafter referred to as the second copy and the third copy) shall be filled with the Apprentice master (if he so desires or with the trainee pending completion of the training).

#### 18. Certificate of passing Diploma in Pharmacy (Part – III):

On satisfactory completion of apprentice period, the apprentice master shall fill SECTION IV the second copy and third copy of the contract Form and cause it to be sent to the head of the academic training institution who shall suitably enter in the first copy of the entries from the second copy and third copy and shall fill SECTION V of the three copies of Contract Form there after hand over both the second copy and third copy to the trainee.

This, if completed in all respects, shall be regarded as a Certificate of having successfully completed the course of diploma in Pharmacy (Part – III).

#### 19. Certificate of Diploma in Pharmacy

A certificate of Diploma in Pharmacy shall be granted by the Annamalai University to a successful candidate on producing certificate of having passed the Diploma in Pharmacy Part – I and Part – II and satisfactory completion of practical training for Diploma in Pharmacy (Part – III).

#### 20. Transitory Regulations

The University shall have powers to revise or change or amend the regulations, the scheme of examinations, the course of study and syllabus as and when the statutory authorities recommend.

## **APPENDIX – A**

### **SYLLABUS**

#### **1.1 PHARMACEUTICS - I**

##### **Theory (75 hours)**

1. Introduction of different dosage forms their classification with examples their relative applications Familiarization with new drug delivery systems.
2. Introduction to Pharmacopoeias with special reference to the Indian Pharmacopoeia.
3. Metrology Systems of Weights and measures Calculation including conversion from one to another system, system, percentage calculations and adjustment of products. Use of alligation method in calculations, solutions.

4. Packaging of Pharmaceuticals – Desirable features of a container – types of containers, Study of glass and plastics as materials for closures – their merits and demerits introduction of aerosol packaging.
5. Size reduction – Objectives, and factors affecting size reduction, methods of size reduction – Study of hammer mill, ball mill, fluid energy mill and Disintegrator.
6. Size separation – Size separation by shifting Official standards for powders Sedimentation methods of size separation, Construction and working of Cyclone separator.
7. Mixing and Homogenization-Liquid mixing and powder mixing, Mixing semisolids. Study of Silverson Mixer-Homogeniser Planetary Mixer Agitated Powder Mixer, triple Roller Miller Propeller Mixer, Colloid Mill and Haod Homogeniser, double cone mixer.
8. Classification and Filtration-Theory of Filtration: filter media Filter aids and selection of filters. Study of the following separation equipments – Filter press Sintered Filters Filter Candles. Metafilter.
9. Extraction and Galenicals – (a) Study of percolation and maceration and their modifications, continuous hot extraction-Applications in the preparation of tinctures and extracts (b) Introduction to Ayurvedic dosage forms.
10. Heat processes – Evaporation – Definitions – Factors affecting evaporation Study of evaporation still and Evaporating pan.
11. Distillation – simple distillation and Fractional Distillation Steam distillation and vacuum still, preparation of Purified Water I.P. and water for injection I.P. Construction and working of the still used for the Same.
12. Introduction to drying process – study of Tray Dryers: Fluidized Bed Dryer, Vacuum Dryer and Freeze Dryer.
13. Sterilization – Concept of sterilization and its differences from disinfection – Thermal resistance of micro organisms Detailed Study to following sterilisation processes.
  - i. Sterilization with moist heat.
  - ii. Dry heat sterilization.
  - iii. Sterilization by radiation.
  - iv. Sterilization and filtration.
  - v. Gaseous Sterilization.

Aseptic techniques – Application of sterilization processes in hospitals with particular reference to surgical dressings and intravenous fluids, precautions for safe and effective handling of sterilization equipment.

14. Processing of Tablets – Definitions; Different types of compressed tablets and their properties processes involved in the production of tablets; tablets

excipients Defects in tablets; Evaluation of Tablets; Physical standards including Disintegration and Dissolution. Tablet coating Sugar coating; film coating enteric coating and micro encapsulation (tablet coating may be dealt in an elementary manner).

15. Processing of capsules – Hard and soft gelatin capsules, different sizes of capsules; filling of capsules handling and storage of capsules, Special applications of capsules.
16. Study of immunological products like sera, vaccines toxoids and their preparations.

### **PRACTICAL (100 hours)**

Preparation (minimum number stated against each) of the following categories illustrating different techniques involved.

1.	Aromatic waters	3
2.	Solutions	4
3.	Spirts	2
4.	Tinctures	2
5.	Creams	2
6.	Cosmetic preparation	3
7.	Capsules	2
8.	Tablets	2
9.	Preparing involving Sterilization	2
10.	Ophthalmic preparations	2
11.	Preparation Involving Aseptic Techniques	2

Books Recommended : (Latest Edition)

1. Remington's Pharmaceuticals Sciences.
2. The extra Pharmacopoeio – Martindaler.

### **PHARMACEUTICAL CHEMISTRY – I**

#### **Theory ( 75 hours)**

1. General discussions on the following inorganic compounds including important physical and chemical properties, medicinal and pharmaceutical uses storage conditions and chemical incompatibility.
  - A. Acids, bases and buffers – Boric acid hydrochloric acid; strong ammonium hydroxide, calcium hydroxide sodium hydroxide, and offici buffers.
  - B. Antioxidants-Hypophosphorous acid, Sulphur dioxide, Sodium bisulphate, Sodium meta bisulphite, Sodium thiosulphate, Nitrogen and Sodium Nitrite.
  - C. Gastrointestinal agents
    - i. Acidifying agents – Dilute hydrochoric acid
    - ii. Antacid – Sodium bicarbonate, aluminium hydroxidegel, aluminium phosphate, calcium carbonate, magnesium carbonate, magnesium trisilicate, magnesium oxide, combinations of antacid preparations.
    - iii. Protectives and Adsorbent – Bismuth subcorbonate Kaolin.
    - iv. Saline cathartics Sodium Pottassium tartate and magnesium sulphate.

D. Topical agents

- i. Protectives-toxic, Zinc Oxide, calamine, Zinc stearate, Titanium dioxide, Silicon polymers.
- ii. Antimicrobials and Astringents-Hydrogen peroxide Potassium permanganate. Chlorinated lime, iodine, Solutions of iodine, Providone-iodine, Boric acid, Borax. Silver nitrate, Mild silver protein, Mercury, yellow mercuric oxide, Ammoniated mercury.
- iii. Sulphur and its compounds Sublimed sulphur, precipitated sulphur, Selenium sulphide.
- iv. Astringents: Alum and Zinc Sulphate.

E. Dental products – Sodium fluoride, stannous fluoride, Calcium carbonate, sodium metaphosphate, dicalcium phosphate, Strontium chloride, Zinc chloride.

F. Inhalants – Oxygen, Carbon dioxide, Nitrous oxide.

G. Respiratory stimulants – Ammonium carbonate.

H. Expectorants and Emetics – Ammonium chloride, Potassium iodide, Antimony Potassium tartrate.

1. Antidotes – Sodium nitrite

2. Major Intra and Extracellular electrolytes.

A. Electrolytes used for replacement therapy-Sodium chloride and its preparations, Potassium chloride and its preparations.

B. Physiological acid base balance and electrolytes used Sodium acetate, Potassium acetate, Sodium bicarbonate injection, Sodium citrate, Potassium citrate, Sodium lactate injection, Ammonium chloride and its injection.

C. Combination of oral electrolyte powders and solutions.

3. Inorganic Official compounds of Iron Iodine, and Calcium Ferrous Sulfate and calcium gluconate.

4. Radio pharmaceuticals and Contrast media – Radio activity – Alpha, Beta and Gamma Radiations, Biological effects of radiations, Measurement of radio activity G.M. Counter – Radio Isotopes – their uses storage and precautions with special reference to the official preparations.

Radio opaque Contrast media-Barium sulphate.

5. Quality control of Drugs and Pharmaceuticals importance of quality control, Significant errors, methods used for quality control, sources of impurities in Pharmaceuticals, Limit tests for Arsenic, chloride, sulfate, Iron and Heavy metals.

6. Identification tests for cations and anions as per Indian Pharmacopoeia.

### **PRACTICAL (75 hours)**

1. Identification test for organic compounds particularly drugs and pharmaceuticals.
2. Limit test for chloride, sulfate Arsenic, Iron and heavy metals.
3. Assay of inorganic Pharmaceuticals involving each of the following methods of compounds marked with (\*) under theory.
  - a. Acid – Base titrations (atleast 3).
  - b. Redox titrations (one each permanganometry and iodimetry).
  - c. Precipitation titrations (atleast 2).
  - d. Complexometric titrations (calcium and Magnesium).

Books recommended (latest editions).

1. Indian pharmacopoeia.

### **1.3 PHARMACOGNOSY**

#### **Theory (75 hours)**

1. Definition history and scope of Pharmacognosy including indigenous system of medicine.
2. Various systems of classification of drugs of natural origin.
3. Adulteration and drug evaluation significance of Pharmacopocial standards.
4. Brief outline of occurrence, distribution outline of isolation, identification tests, therapeutic effects and Pharmaceutical applications of alkaloids, terpenoids, glycosides, volatile oils, tannins and resins.
5. Occurrence, distribution, Organoleptic evaluation, chemical constituents including tests wherever applicable and therapeutic efficacy of following categories of drugs.
  - a. Laxatives Aloes, Rhubarb, Castor oil, Ispaghulla, Senna.
  - b. Cardiotonics – Digitalis, Arjuna.
  - c. Carminatives & G.I. regulators – Umbelliferous fruits. Coriander, Fennel, Ajowan, cardamom, Ginger, Black pepper, Asafoetida, Nutmeg, Cinnamon, Clove.
  - d. Astringents – catechu.
  - e. Drug acting on nervous system – Hyoscyamus Belladonna, Acconite, Ashwagandha, Ephedra, Opium, Cannabis, Nux vomica.
  - f. Antihypertensives – Rauwolfia.
  - g. Antitussives – Vasaka. Tolu balsam, Tulsi.
  - h. Antirheumatics – Guggul, Colchicum.
  - i. Antitumour – Vinca

- j. Antileprotics – Chaulmoogra Oil.
  - k. Antidiabetics – Pterocorups, Gymnema, yivestris.
  - l. Diuretics – Gokhru, Punarnava.
  - m. Antidysenterics – Ipecauanha.
  - n. Antiseptics and disinfectants; Benzoin, Myrrh Neem, curcuma.
  - o. Antimalarials – cinchona.
  - p. Oxytocios – Ergot.
  - q. Vitamines – Shark liver Oil and Amla
  - r. Enzymes-papaya,a diastase, Yeast
  - s. Perfumes and flavouring agents-pepermint Oil, Lemon Oil, Orange Oil, Lemon grass Oil, Sandal wood oil.
  - t. Pharmaceutical aids – Honey, Arachis Oil, Starch, Kaolin, Pectin, Olive oil, Laonlin, Beeswax, Acacia, Tragacanth, Sodium alginate, Agar, Guar gum, gelatin.
  - u. Miscellaneous – Liguorice, Garlic Picrorhiza, discoses, Linseed, Shatavari, Shankhpushpi, Pyrethrums, Tobacco.
6. Collection and preparation of crude drugs for the marker as exemplified by ergot, opium, Rauwolfia, Digitalis, Senna.
  7. Study of source, preparation and identification of fibres used in suture and surgical dressing – cotton, silk, wool and recognised fibres.
  8. Gross anatomical studies of – Senna, Datura, Cinnamon, Cinchona, fennel, Clove, Ginger, Nuxvomica & Ipecacuanha.

### **PRACTICAL (75 hours)**

1. Identification of drugs by morphological characters.
2. Physical and chemical tests for evaluation of drugs wherever applicable.
3. Gross anatomical studies (t.s) of the following drugs Senna, Datura, Cinnomon, Cinchona, Coriander, Fennel, Clove, Ginger, Nuxvomica, Ipecacuanha.
4. Identification of fibres and surigacl dressings.

## **1.4 BIOCHEMISTRY AND CLINICAL PATHOLOGY**

### **Theory (50 hours)**

1. Introduction to Biochemistry.
2. Brief chemistry and role of proteins, polypeptides and amino acids. Classification, Qualitative tests, Biological value Deficiency diseases.
3. Brief Chemistry and role of Carbohydrates, Classification, qualitative tests, Diseases related to carbohydrate metabolism.

4. Brief chemistry and role of Lipids, Classification, qualitative tests, Diseases related, lipids metabolism.
5. Brief Chemistry and role of vitamins and Bioenzymes.
6. Role of minerals and water in life processes.
7. Enzymes; Brief concept of enzymic action. Factors affecting it. Therapeutic and Pharmaceutical importance.
8. Brief concept of normal and abnormal metabolism of proteins, carbohydrates and lipids.
9. Introductions to pathology of blood and urine.
  - a. Lymphocytes and Platelets, their role in health and disease.
  - b. Erythrocytes – Abnormal cells and their significance.
  - c. Abnormal constituents of urine and their significance in diseases.

### **PRACTICAL (75 hours)**

1. Detection and identification of Proteins, Amino acids, Carbohydrates and Lipids.
2. Analysis of normal and abnormal constituents of Blood and Urine (Glucose, Urea, Creatine, Creatinine, cholesterol alkaline phosphatase, acid phosphatase, Bilirubin SGPT, SGOT, Calcium Diastase, Lipase).
3. Examination of sputum and faec (microscopic & staining).
4. Practice in injecting drugs by intramuscular, subcutaneous and intravenous routes, withdrawal of blood samples.

## **1.5 HUMAN ANATOMY AND PHYSIOLOGY**

### **Theory (75 hours)**

1. Scope of Anatomy and Physiology. Definition of various terms used in Anatomy.
2. Structure of cell, function of its components with special reference to mitochondrion microsomes.
3. Elementary tissues of the body i.e. epithelial tissue muscular tissue, and nervous tissue.
4. Structure and functions of skeleton. Classification of joints and their functions, joint disorders.
5. Composition of blood, functions of blood elements, Blood group and coagulation of blood. Brief information regarding disorders of blood.
6. Name and functions of lymph glands.
7. Structure and functions of various part of the heart, Arterial and venous system with special reference to the names and positions of main arteries and

veins. Blood pressure and its recording. Brief information about cardiovascular disorders.

8. Various parts of respiratory system and their functions, Physiology of respiration.
9. Various parts of urinary system and their functions, structure and functions of kidney, physiology of urine formation, pathophysiology of renal diseases and oedema.
10. Structure of skeletal muscle. Physiology of muscle contraction, names positions attachments and functions of various skeletal muscles. Physiology of neuromuscular junction.
11. Various parts of central nervous system, brain and its parts, functions and reflex action. Anatomy and Physiology of autonomic nervous system.
12. Elementary knowledge of structure and functions of the organs of taste, ear, eye and skin. Physiology of pain.
13. Digestive system, names of the various part of digestive system and their functions. Structure and functions of liver, physiology of digestion and absorption.
14. Endocrine glands and Hormones. Location of the glands their hormones and functions. Pituitary, Thyroid, Adrenal and pancreas.
15. Reproductive system, physiology and Anatomy of Reproductive system.

#### **PRACTICAL (50 hours)**

1. Study of the human skeleton.
2. Study with the help of charts and models of the following systems and organs.
  - a. Digestive system.
  - b. Respiratory system.
  - c. Cardiovascular system.
  - d. Urinary system.
  - e. Eye.
  - f. Ear.
3. Microscopic examination of epithelial tissue, cardiac muscle, smooth muscle, skeletal muscle, Connective tissue and nervous tissues.
4. Examination of blood films for TLC, DLC and malarial parasite.
5. Determination of clotting times of blood, erythrocyte sedimentation rate of Hemoglobin value.
6. Recording of body temperature, pulse, heart rate, blood pressure and ECG.

## **1.6 HEALTH EDUCATION AND COMMUNITY PHARMACY**

### **Theory (50 hours)**

1. Concept of health – Definition of Physical Health, mental health, social health – determinants of health, indicators of health, concept of disease, natural history of diseases, the disease agents, concept of prevention of diseases.
2. Nutrition and health – classification of foods, requirements, disease induced due to deficiency of proteins, Vitamins, and Minerals-treatment and prevention.
3. Demography and family planning – demography cycle, fertility, family planning, contraceptive method, behavioural methods, natural family planning method, chemical method, mechanical methods, hormonal contraceptives, population Problem of India.
4. First aid-Emergency treatment on shock, snake-bite burns poisoning, heart disease, fractures and resuscitation methods, elements of minor surgery and dressings.
5. Environment and health-Sources of water supply, water pollution, purification of water, health and air, noise, light-solid waste disposal and control, medical entomology. Arthropod borne diseases and their control, rodents, animals and diseases.
6. Fundamental principles of microbiology – classification of microbes, isolation, staining techniques of organisms of common diseases.
7. Communicable diseases – Causative agents, mode of transmission and prevention.
  - a. Respiratory infection – Chicken pox, measles, influenza, diphtheria, whooping cough and tuberculosis.
  - b. Intestinal infections, Poliomyelitis, Hepatitis, Cholera, Typhoid, Food poisoning, Hookworm infection.
  - c. Arthropod borne infection – Plague, Malaria, Filariasis.
  - d. Surface infection Rabies, Trachoma, Tetanus Leprosy.
  - e. Sexually transmitted diseases – Syphilis, Gonorrhoea, AIDS.
8. Non Communicable disease-Causative agents, care and control of cancer, diabetes, Blindness, Cardiovascular disease.
9. Epidemiology-its scope, methods, uses, dynamics of disease transmission immunization. Immunological products and their dose schedule. Principles of disease control and prevention, hospital acquired/ infection, prevention and control Disinfection types of disinfection, disinfection procedures, for faeces, urine, sputum, room linen, dead bodies instruments.

## 2.1 PHARMACEUTICS - II

### Theory (75 hours)

#### Dispensing Pharmacy:

- i. Prescriptions – reading and understanding of prescriptions. Latin terms commonly used (Detailed study is not necessary), Modern methods of prescribing of metric system. Calculation involved in dispensing.
- ii. Incompatibilities in Prescription – Study of various types incompatibilities-physical, chemical and therapeutic.
- iii. Posology-Dose and dosage of drugs. Factors influencing dose. Calculation of doses on the basis of age, sex, and surface area. Veterinary doses.

#### Dispensing Medications:

(Note A detailed study of the following dispensed medication is necessary. Methods of preparation with theoretical and practical aspects, use of appropriate containers and closures, Special labelling requirements and storage conditions should be high-lighted).

- i. Powders-Types of Powders-Advantages and disadvantages of Powders, granules, canchets and tablet triturates, preparation of different types of powders encountered in prescription Weighing methods, possible errors in weighing, minimum weighable amounts and weighing, of a material below the minimum weighable amount, geometric dilution and proper usage and care of dispensing balance.
- ii. Liquid Oral Dosage forms:
  - a. Monophasic – Theoretical aspects including commonly used vehicles, essential adjuvant, stabilizers, colourants and flavours, with examples.

Review of the following monophasic liquids with details of formulation and practical methods.

Liquids for internal administration	Liquids for external administration or used on mucous membranes
Mixture and Concentrates Syrups	Gargles, Mouth washes, Throat paints.
Elixirs	Douches Ear Drops Nasal Drops & Sprays Liniments, Lotions.

#### b. Biphasic Liquid Forms:

- i. Suspensions (elementary study) – Suspensions containing diffusible solids and liquids and their preparation, Study of the adjuvants used like thickening agents. Wetting agents, their necessity and quantity to be incorporated, Suspensions of precipitate forming liquids like tinctures, their preparations and stability, Suspensions produced by chemical reaction. An introduction to flocculated non-flocculated suspension system.

ii. Emulsion – Types of emulsion, identification of emulsion systems formulation of emulsion, selection of emulsifying agents, Instabilities, in emulsion. Preservation of emulsion.

iii. Semi-Solid Dosage Forms:

a. Ointments-Types of ointments, classification and selection of dermatological vehicles, preparation and stability of ointments by the following processes:

i. Trituration ii. Fusion iii. Chemical reaction iv. Emulsification.

b. Pastes – Differences between ointments and pastes, bases of pastes, preparation of pastes and their preservation.

c. Jellies – An introduction to the different types of jellies.

d. An elementary study of popultice.

e. Suppositories and pessaries – Their relatives merits and demerits, types of suppositories, suppository bases, classification, properties, preparation and packing of suppositories. Use of suppositories for drug – absorption.

iv. Dental Cosmetics preparation :

Introduction to Dentrifices, Facial cosmetics, Deodorants, Antiperspirants, Shampoos, hair dressing and hair removers.

v. Sterile Dosage Forms:

a. Parenteral dosage forms – Definition, General requirments for parenteral dosage forms. Types of parenteral formulations, vehicles, adjuvants, processing personnel, facilities and quality control Preparation of Intravenous fluids and admixtures total parenteral nutrition, Dialysia fluids.

b. Sterility testing particulate matter monitoring – faculty seals – packaging.

c. Ophthalmic products – study of essential characteristics of different ophthalmic preparations formulation additives special precautions in handling and storage of ophthalmic products.

### **PRACTICAL (100 hours)**

Dispensing of atleast 100 products covering a wide range of preparations such as mixtures, emulsion, lotions, liniments, E.N.T. preparations, ointments, Suppositories, powders, incompatible prescriptions etc.

Books recommended (latest editions)

1. Indian Pharmacopoeia.
2. British pharmacopoeia.
3. National Formularies (N.F.I.B.N.F.).

4. Remington's Pharmaceutical Sciences.
5. Martindale's Extra Pharmacopoeia.

## 2.2 PHARMACEUTICALS CHEMISTRY - II

### Theory (100 hours)

1. Introduction to the nomenclature of organic chemical systems with particular reference to hetero-cyclic system containing upto 3 rings.
2. The chemistry of following Pharmaceuticals organic compounds, covering their nomenclature, chemical structures, uses and the important physical and chemical properties, (chemical) structure of only those compounds marked with asterik (\*).

The stability and storage conditions and the different type of Pharmaceutical formulations of these drugs and their popular brand names.

Antiseptics and Disinfectants-Proflavine\*, Benzakonium chloride, Cetrimide, Chloro cresol\*, Chloroxyene, Formaldehyde solution, Hexachlorophene, Liquid phenol, Nitro furantion. Sulfathiazole, Succinyl Sulfathiazole, Sulfadimethazine, Sulfamethoxy pyridazine, Sulfa methoxazole, co-trimoxazole Sulfacetamide.

Antileprotic Drugs – clofazimine, Thiambutosine, Dapsone, Solapsone – Anti tubercular Drugs – Isoniazid\* Pas\*, Streptomycin, Rifampicin, Ethambutol, Thiacetazone, Ethionamide, Cycloserine, Pyrazinamide.

Antiamoebic and Anthelmintic Drugs – Emetine, Metronidazole, Halogenated, hydroxyquinolines, diloxanide furoate paramomycin, Piperazine, Mebendazole D.E.C.

Antibiotics- Benzyl Pencillin, Phenoxy methyl Pencillin, Benzathine Pencillin, Ampicillin, Cloxacillin Carbenicillin, Gentamycin, Neomycin, Erythromycin, Tetracycline, Cephalexin, Cephaloridine, Cephalothin, Griseofulvin, Chloramphenicol.

Antifungal agents-Undecylenic acid, tolnaftate, Nystatin, Amphotericin, Hamycin.

Antimalarial Drugs – Chloroquine, Amodiaquine, Primaquine, Proguanil, Pyrimethamine, Quinine, Trimethoprim.

Transquilizers: Chlorpromazine, Prochlor Perazine, Trifluoperazine, thioridazine, Haloperidol, Triperidol, Oxypertine, Chlorodiazepoxide, Diazepam, Lorazepam, Meprobamate.

Hypnotics: - Phenobarbitone, Butobarbitone, Cyclobarbitone Nitrozeepam, Glutethimide, Methypyrlyon, paraldehyde, Triclofosodium.

General Anaesthetics – Halothane, Cyclopropane, Diethyl ether, methohexital sodium. Thiopental sodium, Trichloro ethylene Antidepressant Drugs – Amitriptyline. Nortriptyline, Imipramine, Phenazine, tranylcypromine.

Analeptics-theophylline, caffeine, Coramine, Dextro amphetamine, Adrenergic Drugs-Adrenaline Nordreanline, Isoprenaline, Phenylephrine, Salbutamol, Terbutra-line, Ephedrine, Pseudo ephedrine. Adrenergic Antagonist Tolazoline, Propranolol, Practolol, Cholinergic Drugs-Neostigmine, Pyridostigmine, Pralidoxime, Pilocarpine Physostigmine.

Cholinergic Antagonists Atropine, Hyoscine, Homatropine Propantheline, benztropine. Tropicamide, Biperidone.

Diuretic Drugs-Furosimide, Chlorthiazide, Hydrochlorthiazide, Benzthiazide, Urea, Mannitol, Ethacrynic-acid.

Cardiovascular Drugs – Ethyl nitrite, Glyceryl trinitrate Aphenmethylopa, Guanethidine Clofibrate Quinidine.

Hypoglycemic Agents-Insulin, Chlorpropamide. Tolbutamide Glibenclamide, Phenformin, Metformin.

Coagulants and AntiCoagulants-heparin, Thrombin, Menadione, Bishydroxycoumarin. Warfarin sodium.

Local anesthetics – Lignocaine, Procaine, Benovacaine Histamine, Promethazine, Cyproheptadine, Mepyramine, Pheniramine, Chlorpheniramine. Analgesics and Antipyretics-Morphine. Pethidine, Codeine, Aspirin, paracetamol, analgin Dextropropoxyphene, Pentazocine, Non-steroidal anti inflammatory Agents indomethacin, Phenylbutazone Oxyphen butazone, Ibuprofen.

Thyroxine and Antithyroids-Thyroxine, Methimazole. Methyl thiouracil Propylthiouracil.

Diagnostic agents Iodoquin Acid. Propylidone, Sulfobromophthalein Sodium, Indisulfonate sodium (indigo Carmine) Evans blue, Congo Red Fluorescein Sodium.

Anticonvulsants, cardiac glycosides, Antiarrhythmic antihypertensives & vitamins.

Steroidal Drug – Betamethazone, Cortisone, Hydrocortisone, Prednisolone, Progesterone, testosterone, Oestradiol, nandrolone. Anti-Neoplastic Drugs-Actinomycins, Azathioprine. Busulfan, Chlorambucil, Cisplatin, cyclophosphamide Daunorubicin, Hydrochloride, fluorouracil, Mercaptopurine Methotrexate, Mytomycin.

Books recommended [Latest Editions:]

1. Pharmacopoeia of India.
2. British Pharmaceutical Codex.
3. Martindale's Extra Pharmacopoeia.

### **PRACTICAL (75 hours)**

1. Systematic qualitative testing of organic drugs involving solubility determination, melting point and/ or boiling point. Detection of elements and functional groups (10 compounds).
2. Official identification tests for certain groups of drugs included in the I.P. like barbiturates, sulfonamides, phenothianines, Antibiotics etc. (8 compound).
3. Preparation of three of simple organic preparations.

### **2.3 PHARMACOLOGY & TOXICOLOGY**

#### **Theory (75 hours)**

1. Introduction to Pharmacology, scope of Pharmacology.
2. Routes of administration of drugs, their advantages and disadvantages.
3. Various processes of absorption of drugs and the factors affecting them Metabolism, distribution and excretion of drugs.
4. General mechanism of drugs action and the factors which modify drug action.
5. Pharmacological classification of drugs. The discussion of drug should emphasise the following aspects.

Drug acting on the Central Nervous system:

- a) General anaesthetics, adjuncts to anaesthesia, intravenous anaesthetics.
  - b) Analgesic and non steroidal anti-inflammatory drugs. Narcotic analgesics. Antirheumatic and antigout remedies Sedatives and Hypnotics, Psycho pharmacological agents, anti convulsants, analeptics.
  - c) Neurone blockers and ganglion blockers.
  - d) Neuromuscular blockers, drugs used in myasthenia gravis.
- iv) Drugs acting on eye. Mydriatics, drugs used in glaucoma.
  - v) Drugs acting on respiratory system respirator stimulants Bronchodilators, nasal decongestant. expectorants and Antitussive agents.
  - vi) Antacids, physiological role of histamine and serotonin, histamine and Antihistamines, Prostaglandins.
  - vii) Cardio Vascular Drugs Cardiotonics, Antiarrhythmic agents, Antianginal agents, Antihypertensive agents, Peripheral Vasodilators and drugs used in atherosclerosis.
  - viii) Drugs acting on the blood and blood forming organs Haematinics, coagulants and anticoagulants, Haemostatics, Blood substitutes and plasma expanders.
  - ix) Drugs effecting renal function Diuretics and antidiuretics.
  - x) Hormones and hormone antagonists Hypoglycemic agents, Antithyroid drugs, sex hormone and oral contraceptives corticosteroids.

6. Chemotherapy of microbial disease Urinary antiseptics, Sulphonamides, Penicilins, Streptomycin Tetracyclines and other antibiotics, Antitubercular agents, Antifungal agents, antiviral drugs antileprotic drugs.
7. Chemotherapy of protozoal diseases Anthelminti drugs.
8. Chemotherapy of cancer.
9. Disinfectants and antiseptics. A detailed study of the action of drugs on each organ is not necessary.

## **PHARMACOLOGY**

### **PRACTICAL (50 hours)**

The first six of the following experiments will be done by the students while the remaining will be demonstrated by the teacher.

1. Effect of K<sup>+</sup>, Ca<sup>++</sup>, acetyl choline and adrenaline on frog's heart.
2. Effect of acetyl choline on rectus abdominis muscle of Frog and guinea pig ileum.
3. Effect of spasmogens and relaxants on rabbits intestine.
4. Effect of local anaesthetics on rabbit cornea.
5. Effect of mydriatics and miotics on rabbits cornea.
6. To study the action of strychnine on frog.
7. Effect of hyphnotics in mice.
8. Effect of digitalis on frog's heart.
9. Effect of convulsants and anti convulsant in mice and rats.
10. Test for pyrogens.
11. Taming and potentiating of hypnosis effecting of chloripromazine in mice/rats.
12. Effect of diphenhydramine in experimentally produced asthma in guinea pigs.

## **2.4 PHARMACEUTICALS JURISPRUDENCE**

### **Theory (50 hours)**

1. Origin and nature of Pharmaceutical legislation in India its scope and objectives. Evolution of the Concept of Pharmacy as an integral part of the health care system.
2. Principle and significance of Professional Ethics, Clinical study of the code of Pharmaceutical Ethics drafted by Pharmacy Council of India.
3. Pharmacy Act 1948 The general study of the Pharmacy Act with special reference to education Regulation working of State and Central Councils, constitution of these councils and functions. Registration procedures under the Act.

4. The drugs and Cosmetic Act, 1940 – General Study of the Drugs and Cosmetics Act and the Rules thereunder definition and salient features related to retail and whole sale distribution of drugs. The powers of Inspectors, the sampling procedures and the procedure and formalities in obtaining licences under the rule. Facilities to be provided for running a pharmacy effectively. General study of the schedules with special reference to schedules C, C, F, C, U, H, P and X and salient features labelling and storage conditions of drugs.
5. The drugs and magic remedies (Objectionable Advertisement) Act 1954 – General study of the Act Objectives, special reference to be laid on Advertisement. Magic remedies and objectionable and permitted advertisements diseases which cannot be claimed to be cured.
6. Narcotic Drugs and Psychotropic Substances Act 1985 – A brief study of the act with special reference to its objectives offences and punishment.
7. Brief introduction to the study of the following acts.
  1. Latest Drugs (Price Control Order in force).
  2. Poisons Act 1919 (as amended to date).
  3. Medicinal and Toilet Preparation (Excise Duties) Act, 1955 (As amended to date).
  4. Medical Termination of pregnancy Act. 1971 (as amended to date).

Books Recommended (Latest edition):

Bare Acts of the said laws published by the Government.

## **2.5 DRUG STORE AND BUSINESS MANAGEMENT**

### **Theory (75 hours)**

Part – I Commerce (50 hours)

1. Introduction – Trade, Industry and commerce, Functions and subdivision of Commerce. Introduction to Elements of Economics and Management.
2. Forms of Business Organisations.
3. Channels of Distribution.
4. Drug House Management-selection of Site, Space lay-out and legal requirement Importance and Objectives of purchasing, selection of suppliers, credit information, tenders Contracts, and Price determination. And legal requirements there to. Codification, handling of drug stores and other hospitals supplies.
5. Inventory Control – Objects and importance, Modern techniques like ABC, VED analysis, the lead time, inventory carrying cost. Safety stock, minimum and maximum stock levels, economic order quantity scrap and surplus disposal.

6. Sales Promotion Market Research, Salesmanship qualities of a salesman, Advertising and compensation of the pharmacist.
7. Recruitment, training, evaluation and compensation of the pharmacist.
8. Banking and Finance – Service and functions of banks, Finance planning and sources of finance.

### **PART – II ACCOUNTANCY (25 hours)**

1. Introduction to the accounting concepts and conventions, Double entry, Book keeping Different kinds of accounts.
2. Cash Book.
3. General Ledger and Trail balance Sheet.
4. Profit and Loss Account and Balance Sheet.
5. Simple techniques of analysing financial statements. Introduction to Budgeting.

Books Recommended (Latest Edition)

1. Remington Pharmaceuticals Sciences.

### **2.6 HOSPITAL AND CLINICAL PHARMACY**

#### **Theory (75 hours)**

1. Part – I Hospital Pharmacy.
  1. Hospital Definition, Function Classifications based on various criteria, organisation. Management and health delivery system in India.
  2. Hospital Pharmacy:
    - a) Definition.
    - b) Functions and objectives of Hospital
    - c) Location, layout Flow chart of materials and men.
    - d) Personnel and facilities requirements including equipments based on individual and basic needs.
    - e) Requirements and abilities required for Hospital Pharmacists.
  3. Drug Distribution System in Hospitals:
    - a) Out-patient services.
    - b) In-patient services: a) types of services, b) detailed discussion of Unit Dose systems Floor ward stock system, Satellite pharmacy services, Control sterile services, Bed Side pharmacy.
  4. Manufacturing:
    - a) Economical considerations, estimation of demand.
    - b) Sterile manufacture large and small volume parenterals, facilities, requirements, layout, Production planin, man-power requirements.

- c) Non-sterile manufacture Liquid orals, externals, Bulk concentrates.
- d) Procurement of stores and testing of raw materials.
- 5. Nomenclature and uses of surgical Instruments and hospital Equipments and health accessories.
- 6. P.T.C. (Pharmacy & Therapeutic Committee) Hospital Formulary System and their organisations, functioning Composition.
- 7. Drug Information services and Drug Information Bulletin.
- 8. Surgical dressing like cotton, gauze bandages and adhesive tapes including their pharmacopoeia tests for quality. Other hospital supply eg. I.V. sets, B.G. sets, Ryles tubes, Catheters, Syringes etc.
- 9. Application of computer in Maintenance of records inventory control, Modification, monitoring, drug information and data storage and retrieval in hospitals and retail pharmacy establishments.

#### Part – II: Clinical Pharmacy:

- 1. Introduction to Clinical Pharmacy, Practices, Definition, scope.
- 2. Modern dispensing aspects, Pharmacists and patient counselling and advice for the use of common drugs, medication history.
- 3. Common daily terminology used in the practice of Medicine.
- 4. Disease manifestations and pathophysiology including salient symptoms to understand the disease like Tuberculosis Hepatitis, Rheumatoid Arthritis, Cardio-Vascular diseases Epilepsy. Diabetes, Peptic Ulcer, Hypertension.
- 5. Physiological parameters with their significance.
- 6. Drug Interactions:
  - a) Definition and introduction.
  - b) Mechanism of Drug interaction.
  - c) Drug-drug interaction with reference to analgesics, diuretics cardiovascular drugs, Gastrointestinal agent.
  - d) Drug-food interaction.
- 7. Adverse Drug Reactions:
  - a) Reactions and significance.
  - b) Drug-induced diseases and Teratogenicity.
- 8. Drug in Clinical Toxicity – Introduction general, treatment of poisoning, systematic antidotes, Treatment of insecticide poisoning heavy poison, Narcotic drug, Barbiturate, Organophosphorus poisons.
- 9. Drug dependents Drug abuse, addictive drugs and their treatment complications.
- 10. Bio availability of drugs, including factors affecting it

Books Recommended: (Latest Edition).

1. Remington's Pharmaceutical Sciences.
2. Martindale's Extra Pharmacopaeis

**PRACTICAL (50 hours)**

1. Preparation of transfusion fluids.
2. Testing raw materials used in (1)
3. Evaluation of surgical dressings.
4. Sterilization of surgical instruments, glass-ware and other hospital supplies.
5. Handling and use of data processing equipments.

## **APPENDIX – B**

**(See Regulation 21(1))**

### **PRACTICAL TRAINING CONTRACT FORM FOR PHARMACISTS**

#### **SECTION - I**

This form has been issued ..... (Name of student pharmacist) son of / daughter of ..... residing at ..... who has produced evidence before me that he/she is entitled to receive the practical training as set out in the Education regulation framed under section 10 of the Pharmacy Act, 1948.

The Head of the Academic  
Training Institution

Date:

#### **SECTION - II**

I ..... accept (Name of the student Pharmacist) ..... (of) ..... (Name of the Apprentice Master) (Name of the Institution) ..... Hospital or Pharmacy as my Apprentice master for the above training and agree to obey and respect him / her during entire period of my training.

.....  
Student Pharmacist

#### **SECTION - II**

1. .... (Name of the apprentice master) ..... (Name of the Student Pharmacist) trainee and I agree to give him / her training facilities in my organisation so that during his / her training he / she may acquire:

1. Working knowledge of keeping of records required by the various Acts affecting the profession of pharmacy and
2. Practical experience in:
  - a) The manipulation of pharmaceutical apparatus in common use.
  - b) The reading translation and copying of prescriptions including the checking of doses.
  - c) The dispensing of prescriptions illustrating the commoner methods of administering medicaments and
  - d) The storage of drugs and medicinal preparations. I also agree that a Registered Pharmacist shall be assigned his / her guidance.

(Apprentice Master)

(Name and address of the Institution)

#### **SECTION - IV**

I certify that ..... (Name of the Student Pharmacist) has undergone ..... hours training spread over ..... months in accordance with the details enumerated in SECTION III.

.....  
Head of the Organisation or  
(Pharmaceutical Division)

#### **SECTION - V**

I certify that ..... (Name of Student Pharmacist) has completed in all respect his practical training under regulation 20 of the Education Regulations framed under section 10 of the Pharmacy Act, 1948. He had his practical training in an Institution approved by the Pharmacy Council India.

.....  
(Head of the Academic Institution)

Date:
